

## **SCO BRINGS MOBILE SERVICES TO PALM TREO 700 SMARTPHONES**

*Palm's Treo 700w and Treo 700p become reference platforms for Shout, Vote, HipCheck, Action, and other mobile services available from SCO*

**LAS VEGAS—SCO FORUM—August 7, 2006**—The SCO Group, Inc. (“SCO”) (Nasdaq: SCOX), a leading provider of UNIX<sup>®</sup> software technology and mobile services, today announced the company has made the Palm<sup>®</sup> Treo<sup>™</sup> 700w and Palm Treo 700p smartphones reference platforms for SCO’s expanding number of mobile services. In addition, SCO has become a member of Palm’s PluggedIn developer program to more easily develop and deploy SCO mobile services on the Treo 700 series.

“SCO has shown a high degree of innovation with the mobile services they have created for the Treo platform,” said Mike Rank, director of Developer Relations at Palm, Inc. “We look forward to continuing our work with them on the Palm Treo 700 series as they continue to help Treo users gain even greater value from their devices.”

SCO first delivered its current Me Inc. Shout and Vote mobile services on the Palm Treo platform in 2005 with the Treo 600 and Treo 650 smartphones. SCO announced plans last year to introduce other mobile services and will soon deliver the first of these with the release of HipCheck for remote control and monitoring of Windows and UNIX systems as well as clients including the upcoming release of Windows Vista.

“We chose the Palm Treo smartphone as our initial reference platform because of the large user base and the flexibility of the platform,” said Sandy Gupta, chief technology officer and general manager of the SCO platforms division. “The smart handheld device market is growing rapidly and is expected to continue this growth during the next five years and beyond. We have an entry into this market through both the Palm OS<sup>®</sup> and Windows Mobile operating systems. Our continued development work with Palm will help our customers become more productive and allow us to deliver more mobile services to customers throughout the world in the coming years.”

## **About SCO**

The SCO Group (Nasdaq: SCOX) is a leading provider of UNIX software technology and mobile services, offering SCO OpenServer for small to medium business, UnixWare for enterprise applications, and Me Inc. and EdgeClick for mobile services. SCO's highly innovative and reliable solutions help millions of customers grow their businesses everyday, from SCO OpenServer on main street to UnixWare on Wall Street, and beyond. SCO owns the core UNIX operating system, originally developed by AT&T/Bell Labs and is the exclusive licensor to Unix-based system software providers.

Headquartered in Lindon, Utah, SCO has a worldwide network of thousands of resellers and developers. SCO Global Services provides reliable localized support and services to partners and customers. For more information on SCO products and services, visit [www.sco.de](http://www.sco.de).
