**PRO FOOTBALL STATISTICIAN BENEFITS FROM
ME INC. MOBILE SERVICES**

Mobile BIS and Me Inc. mobile services team up to help football consultant communicate stats to team personnel and football fans around the world

LOS ANGELES – Sept. 7, 2006 – BIS Computer Solutions, Inc., Mobile Division, Mobile BIS, a leading provider of mobile application software to many vertical and horizontal markets, today announced a strategic relationship with Goode Sports and *budgoodesports.com*, to utilize the Me Inc. Shout service, a mobile service developed and recently released by The SCO Group, Inc. (“SCO”) (NASDAQ: SCOX).

Mobile BIS, a premier SCO partner for Me Inc. mobile services, announced today that Goode Sports will utilize its world-renowned, state-of-the-art, pro football statistics web site, in conjunction with Shout, a web-based desktop and mobile application that allows users to send audio and text messages to thousands of users at once.

Goode Sports and the *budgoodesports.com* web site provide statistical analysis for many pro football coaches and to the general public. The site maintains sophisticated technology to produce information for coaches and executive personnel in order for them to be successful, in a real time environment. The site also provides long-term analysis to head coaches and general managers on their weakest statistics.

“Goode Sports has provided analysis for many teams for more than 40 years, and on the world wide web since 1994,” said Bud Goode, president of Goode Sports. “I have consulted with 20 teams and 10 have advanced to the Super Bowl, including for example,

Coach Dick Vermeil in 1999, coach of the Saint Louis Rams. Within one year of using the statistical analysis software, Dick Vermeil went to the Super Bowl, based on one independent STAT “Yards Per Pass Attempt.” Vermeil improved his weakest STAT by matching the leader, adding 9 ½ points per game to win the Super Bowl. Goode Sports will be able to provide true voice analysis using Shout, making it more interpretable for head coaches and general managers. The bottom line is this technology now allows us to better serve our clients, and fans, with added emotional content.”

No longer will the web site just have statistics based on graphical representation; Goode Sports will use voice technology to explain what the most important statistics are, using the Me Inc. Shout service. Me Inc. Shout is a mobile service for communications on handheld devices, smart phones, and desktop computers. Recipients of Me Inc. Shout messages can receive Shouts on either their wireless phone or through their e-mail.

Goode Sports will debut this technology to the NFL community during the NFL’s opening game of Pittsburgh vs. Miami on Thursday, September 7. Goode Sports will also provide weekly pre-game, halftime and post-game analysis using its award-winning web site *budgoodesports.com* with Shout. “I am very excited to be able to use this type of technology on Goode Sports web site to allow the digital community, and our fans, to hear audio transcriptions on our web site and mobile phones. Not only does it bring a new technology and value to our web site, but it allows our subscribers to get more use out of the site by listening to reliable STAT analysis,” said Goode.

Mobile BIS is pleased to be able to provide Goode Sports with state-of-the-art technology to more efficiently provide game statistics and analysis. “Our main goal is to provide Goode Sports with technology that will allow them to more accurately analyze pro football games,” said Michael Macho, director of Mobile BIS, BIS Computer Solutions.
