

SHOUT POSTCARD DEBUTS AT CES SHOW

New mobile service lets users quickly share life's moments on-the-go with pictures, text and voice on a personalized, multimedia postcard

LAS VEGAS – Consumer Electronics Show (CES) – Jan. 8, 2007 – The Me Inc.

mobile division of The SCO Group, Inc. (“SCO”) (NASDAQ: SCOX), a leading provider of UNIX[®] software technology and mobile services, today announced the availability of the public beta of Shout Postcard, a new mobile service that lets users quickly and easily share life’s experiences on-the-go through photos, text and voice. Designed for Palm Treo smart phones, Shout Postcard features a colorful, easy-to-use screen that helps users quickly combine a photo, a recorded audio message up to a minute long, and text to create a personalized, multimedia postcard that can then be sent to co-workers, friends and family.

The free version of Shout Postcard can be used to send a greeting to up to five contacts at once, while the upcoming commercial version allows for sending postcards to a larger number of contacts or groups. Shout Postcards can be sent to a recipient’s e-mail or to other Palm Treo smart phones that have Shout Postcard. For PC and laptop users, a web version of Shout Postcard will also be available for use with most web browsers. PC users gain the same features as Palm Treo users to send Shout Postcards using photos on their PC combined with voice and text.

“The Shout Postcard service is ideal for sharing life’s events such as birthdays, graduations, recitals, concerts, vacations, or any memorable event that users want to share with others,” said Shaun Cutler, director of product management for Me Inc. Shout mobile solutions, The SCO Group. “We designed Shout Postcard for anyone to share photos, audio and text in as little as two minutes. With a free version now available, we anticipate that Shout Postcard will become a fun, new way for people on the go to share life’s events with their social network.”

Shout Postcard is one of many available mobile products from the Me Inc. mobile division of SCO. Other mobile products include Shout, Vote, HipCheck and the

upcoming release of DT4, the Day-Timers mobile solution for personal and group productivity. All of these mobile solutions are featured at www.me-inc.com.

Pricing and Availability

The free, pre-release version of Shout Postcard for use with five contacts or less is currently available for download at www.shoutpostcard.com. The commercial version of Shout Postcard that allows users to send Shout Postcards to larger numbers of recipients at once will be available in the coming weeks. Once loaded onto a Palm Treo, the program can be beamed to other Palm Treo users. For more information on Shout Postcard, call +1-801-932-5423.

About SCO

The SCO Group (Nasdaq: SCOX) is a leading provider of UNIX software technology and mobile services, offering SCO OpenServer for small-to-medium business, UnixWare for enterprise applications, and Me Inc. for mobile services.
