

UnixWare 7 information

UnixWare 7 Websites

Product Website International <http://www.sco.com/products/unixware714/>

Product Website Russia: <http://www.ru.sco.com/products/unixware/714/>

Support Database (Knowledge Center): <http://www.sco.com/ta>

Certified Hardware Database: <http://www.sco.com/chwp>

Short summary about compatibility between UnixWare 7 and OpenServer 6

OpenServer 6 is binary compatible to OpenServer 5 and UnixWare 7!

Your UnixWare 7 application will run on OpenServer 6 and your OpenServer 6 application will run on UnixWare. (Current Maintenance Packs needs to be installed)

UnixWare drivers work on OpenServer 6.

What is new in UnixWare 7.1.4 is available at

http://www.sco.com/products/unixware714/uw714_whats_new.html

Informations about the **current Maintenance Pack 3** is available at:

http://www.sco.com/products/unixware714/uw714_mp3.html

A **Reviewers Guide** is available from

http://www.sco.com/products/unixware714/reviewers_guide_UW714NL.pdf

Product Documentation and Support Downloads

The Online Product Documentation is available at: <http://www.sco.com/support/docs/>

Updates and Patches (e.g. Maintenance Pack 3) as well as drivers can be downloaded from the web at: <http://www.sco.com/support/update/download/product.php?pfid=1&prid=6>

Testing UnixWare 7.1.4

The easiest way to test UnixWare is to download the installation CD image from:

<http://www.sco.com/support/update/download/release.php?rid=173>

You can press the **F8** key during installation to enable a 60 day EVAL license. (Business Edition, 10 user, 4CPUs)

Overview

A **PDF file of a recent UNIX presentation** (March 2007) is available at:
